

Doctor Luke J. Shingles

Skills and interests

I am a scientist and software engineer focused on using software to solve complex problems on high-performance computers. Through my training in Software Engineering and experience in scientific research, I have been able to apply high-performance algorithms and data structures to build astrophysical simulations, while also developing skills in data analysis, visualisation, and technical communication through papers and presentations.

Some my highlights have included writing high-performance parallel code to numerically solve systems of differential equations (e.g., to model chemical enrichment of stellar clusters and high-energy particle interactions), using matrix-based methods for solving large systems of linear equations (to determine atomic level populations), and applying Monte Carlo techniques to simulate photon interactions (radiative transfer) in three dimensions within material ejected from supernova explosions. The analysis of my theoretical simulations running on thousands of CPU cores and the comparison to real-world observations has led to research insights that have been published in peer-reviewed scientific journals.

From my interest in parallel algorithms, I have naturally become excited about the use of GPUs to accelerate numerical problem-solving. My own experiments with NVIDIA CUDA have found that large performance benefits can be gained quickly, and even greater benefits can be achieved through further optimisation and a deeper understanding of the hardware. I am also interested in machine learning and computer vision, and look for opportunities to work with these technologies, to solve problems by developing optimised code for CPUs and GPUs, and to keep up with latest developments in parallel and heterogeneous computing.

[LinkedIn Profile](#)

Email

l.shingles@qub.ac.uk

Citizenship

Australia, Ireland

Languages

English (native), Portuguese (basic), Mandarin Chinese (basic)

Address

Astrophysics Research Centre,
School of Mathematics and Physics,
Queen's University Belfast
Belfast, Co. Antrim, BT7 1NN
Northern Ireland, United Kingdom

Programming experience

C, Fortran, Python (numpy/pandas/matplotlib), parallelism with CUDA, MPI, and OpenMP. Most of the scientific simulation codes I have worked on are not publicly available. However, some [plotting and analysis tools](#) I developed for the radiative transport code and the [Fortran/OpenMP chemical evolution code](#) are public on my [GitHub Profile](#).

Education and recent experience

Postdoctoral Research Fellow, Queen's University Belfast, Aug 2015–present
Working in the research group of Stuart Sim developing a 3D radiative transfer code to model Type Ia supernovae in their nebular phase (hundreds of days after explosion).

Doctor of Philosophy (Astrophysics), Australian National University, 2012–2015
Thesis: '[Neutron-Capture Nucleosynthesis and the Chemical Evolution of Globular Clusters](#)'

Department: Research School of Astronomy & Astrophysics

Primary Supervisor: Amanda Karakas

Advisors: David Yong, Gary Da Costa, John Lattanzio (Monash), Richard Stancliffe (Bonn)

Bachelor of Science with Honours (First Class), Australian National University, 2008–2011

Majors: Astronomy & Astrophysics, Theoretical Physics, Mathematics

Thesis: 'The Sulfur Anomaly in Planetary Nebulae and Post-AGB Stars'

Department: Research School of Astronomy & Astrophysics

Supervisor: Amanda Karakas

Bachelor of Information Technology, Queensland University of Technology, 2003–2007

Major: Software Engineering

Awards and Scholarships

RSAA Alex Rodgers Travelling Scholarship, 2014

Astronomical Society of Australia Travel Assistance, 2014

RSAA Honourable Mention for Best Student Paper Prize, 2013

IAU Travel Grant for IAUS298, 2013

Australian Postgraduate Award, 2012-2015

International Year of Astronomy Honours Scholarship, 2011

RSAA Summer Research Scholarship, 2010

Service and Committees

QUB School of Maths and Physics Postdoctoral Society Representative, Jan 2016–present

QUB School of Maths and Physics Athena SWAN committee for gender equality, Jan 2016–present

QUB ARC Supernova Journal Club coordinator, Oct 2015–Oct 2016

ANU RSAA Stellar Lunch coordinator, Feb 2014–Nov 2014

ANU RSAA Computer Committee, Oct 2013–Apr 2015

Technical Presentations

Contributed talk, The extragalactic explosive Universe: the new era of transient surveys and data-driven discovery, Garching, Germany, September 2019

Contributed talk, Workshop on Radiative Transfer in Supernovae, Garching, Germany, August 2019

Contributed talk, XIXth Workshop on Nuclear Astrophysics, Ringberg, Germany, March 2019

Invited Colloquium, ASTRON Institute for Radio Astronomy, Dwingeloo, Netherlands, November 2018

Contributed Talk, Radiation Transfer and Explosive Thermonuclear Burning in Supernovae, Rehovot, Israel, June 2018

Poster Presentation, Supernovae From Simulations to Observations and Nucleosynthetic Fingerprints, Bad Honnef, Germany, January 2017

Contributed Talk, Supernovae: The Outliers, Garching, Germany, September 2016

Contributed Talk, RAS National Astronomy Meeting, Nottingham, UK, July 2016

Contributed Talk, 18th Workshop on Nuclear Astrophysics, Ringberg, Germany, March 2016
 Group Talk at Stars Meeting, Institute of Astronomy, Cambridge, UK, Nov 2015
 Seminar, QUB, Belfast, UK, Oct 2015
 Contributed Talk, ASA AGM, Perth, Australia, July 2015
 Contributed Talk, ANITA Workshop, Canberra, Australia, Feb 2015
 Contributed Talk, Mount Stromlo Student Christmas Seminars, Canberra, Australia, Nov 2014
 Group Talk at Stars Meeting, Institute of Astronomy, Cambridge, UK, Sept 2014
 Contributed Talk, Nucleosynthesis in AGB Stars, Bad Honnef, Germany, July 2014
 Contributed Talk, Overcoming Great Barriers in Galactic Archaeology II, Palm Cove, Australia, 2014
 Group Talk at Stellar Lunch, ANU RSAA, Australia, August 2013

Teaching Experience

Level Four MSci Project Queen's University Belfast
 Sept 2017 – Jan 2018

Co-supervised two MSci students with projects on positron emission from Type Ia supernovae and high-mass stellar evolution with helium-rich abundances.

PHY1001 Foundation Physics Queen's University Belfast
 Oct 2017

Presented lectures on circular motion and simple harmonic oscillators.

ANU-ASTRO2x Exoplanets Australian National University
 Jun–Sep 2015

Teaching assistant for edX online course run by Brian Schmidt and Paul Francis on exoplanet search techniques – pulsar timing, radial-velocity variations, transits, microlensing, and direct imaging with adaptive optics.

ANU-ASTRO1x Greatest Unsolved Mysteries of the Universe, Australian National University
 Mar–Jun 2015

Teaching assistant for edX online course run by Brian Schmidt and Paul Francis covering the expanding universe, dark energy, dark matter, and gamma-ray bursts.

ASTR3007 From Stars to Galaxies Australian National University
 Feb–Jun 2013 and May–Jun 2014

Teaching assistant for the third-year course on stellar evolution & nucleosynthesis, galactic structure & dynamics, and introductory computer programming. Duties included marking assignments and answering student questions in the classroom.

PHYS1201 Physics 2 Australian National University
 Jul–Nov 2012 and Jul–Nov 2013

Teaching assistant for first-year course covering introductory special relativity, electromagnetism, waves & optics, and thermodynamics. Duties included marking assignments and answering student questions in the classroom.

Refereed Journal Articles

Monte Carlo radiative transfer for the nebular phase of Type Ia supernovae

L. Shingles, S. A. Sim, M. Kromer, K. Maguire, M. Bulla, C. Collins, C. P. Ballance, A. S. Michel, C. A. Ramsbottom, F. K. Röpkke, I. R. Seitenzahl, N. B. Tyndall, 2019, MNRAS (submitted)

A year-long plateau in the late-time near-infrared light curves of Type Ia supernovae

Or Graur, Kate Maguire, Russell Ryan, Matt Nicholl, Arturo Avelino, Adam G. Riess, **Luke Shingles**, Ivo R. Seitenzahl, and Robert Fisher, 2019, Nature Astronomy (accepted)

[Using late-time optical and near-infrared spectra to constrain Type Ia supernova explosion properties](#)

K. Maguire, S. A. Sim, **L. Shingles**, J. Spyromilio, A. Jerkstrand, M. Sullivan, T.-W. Chen, R. Cartier, G. Dimitriadis, C. Frohmaier, L. Galbany, C. P. Gutiérrez, G. Hosseinzadeh, D. A. Howell, C. Inserra, R. Rudy, J. Sollerman, 2018, MNRAS

[A kilonova as the electromagnetic counterpart to a gravitational-wave source](#)

S. J. Smartt, T.-W. Chen, A. Jerkstrand, M. Coughlin, E. Kankare, S. A. Sim, M. Fraser, C. Inserra, K. Maguire, K. C. Chambers, M. E. Huber, T. Krühler, G. Leloudas, M. Magee, **L. J. Shingles**, and 107 additional authors, 2017, Nature

[Multi-messenger Observations of a Binary Neutron Star Merger](#)

Joint-authored by several collaborations including ePESSTO (including **L. J. Shingles**), 2017, The Astrophysical Journal Letters

[A chemical signature from fast-rotating low-metallicity massive stars: ROA 276 in omega Centauri](#)

David Yong, John E. Norris, Gary S. Da Costa, Laura M. Stanford, Amanda I. Karakas, **Luke J. Shingles**, Raphael Hirschi, Marco Pignatari, 2017, ApJ, 837, 176

[Evolution and nucleosynthesis of helium-rich asymptotic giant branch models](#)

Luke J. Shingles, Carolyn L. Doherty, Amanda I. Karakas, Richard J. Stancliffe, John C. Lattanzio, Maria Lugaro, 2015, MNRAS, 452, 2804

[Iron and s-element abundance variations in NGC 5286: comparison with anomalous' globular clusters and Milky Way satellites](#)

A. F. Marino, A. P. Milone, A. I. Karakas, L. Casagrande, D. Yong, **L. Shingles**, G. Da Costa, J. Norris, P. B. Stetson, K. Lind, M. Asplund, R. Collet, H. Jerjen, L. Sbordone, A. Aparicio, & S. Cassisi, 2015, MNRAS, 450, 815

[The s-process enrichment of the globular clusters M4 and M22](#)

Luke J. Shingles, Amanda I. Karakas, Raphael Hirschi, Cherie K. Fishlock, David Yong, Gary S. Da Costa, & Anna F. Marino, 2014, ApJ, 795, 34

[Iron and neutron-capture element abundance variations in the globular cluster M2 \(NGC 7089\)](#)

David Yong, Ian U. Roederer, Frank Grundahl, Gary S. Da Costa, Amanda I. Karakas, John E. Norris, Wako Aoki, Cherie K. Fishlock, A. F. Marino, A. P. Milone, & **Luke J. Shingles**, 2014, MNRAS, 441, 3396

[Augmented reality in astrophysics](#)

Frédéric Vogt & **Luke J. Shingles**, 2013, Ap&SS, 347, 47

[Is the sulphur anomaly in planetary nebulae caused by the s-process?](#)

Luke J. Shingles & Amanda I. Karakas, 2013, MNRAS, 431, 2861
