# Doctor Luke J. Shingles

**Skills and interests**

I am a scientist and software engineer focused on using software to solve complex problems on high-performance computers. Through my training in Software Engineering and experience in scientific research, I have been able to apply high-performance algorithms and data structures to build astrophysical simulations, while also developing skills in data analysis, visualisation, and technical communication through papers and presentations.

Some my highlights have included writing high-performance parallel code to numerically solve systems of differential equations (e.g., to model chemical enrichment of stellar clusters and high-energy particle interactions), using matrix-based methods for solving large systems of linear equations (to determine atomic level populations), and applying Monte Carlo techniques to simulate photon interactions (radiative transfer) in three dimensions within material ejected from supernova explosions. The analysis of my theoretical simulations running on thousands of CPU cores and the comparison to real-world observations has led to research insights that have been published in peer-reviewed scientific journals.

From my interest in parallel algorithms, I have naturally become excited about the use of GPUs to accelerate numerical problem-solving. My own experiments with NVIDIA CUDA have found that large performance benefits can be gained quickly, and even greater benefits can be achieved through further optimisation and a deeper understanding of the hardware. I am also interested in machine learning and computer vision, and look for opportunities to work with these technologies, to solve problems by developing optimised code for CPUs and GPUs, and to keep up with latest developments in parallel and heterogeneous computing.

[LinkedIn Profile](#)

**Email**

[l.shingles@qub.ac.uk](mailto:l.shingles@qub.ac.uk)

**Citizenship**

Australia, Ireland

**Languages**

English (native), Portuguese (basic), Mandarin Chinese (basic)

**Address**

Astrophysics Research Centre,
School of Mathematics and Physics,
Queen's University Belfast
Belfast, Co. Antrim, BT7 1NN
Northern Ireland, United Kingdom

**Programming experience**

C, Fortran, Python (numpy/pandas/matplotlib), parallelism with CUDA, MPI, and OpenMP. Most of the scientific simulation codes I have worked on are not publicly available. However, some [plotting and analysis tools](#) I developed for the radiative transport code and the [Fortran/OpenMP chemical evolution code](#) are public on my [GitHub Profile](#).

## Education and recent experience

*Postdoctoral Research Fellow*, Queen's University Belfast, Aug 2015–present
Working in the research group of Stuart Sim developing a 3D radiative transfer code to model Type Ia supernovae in their nebular phase (hundreds of days after explosion).

*Doctor of Philosophy (Astrophysics)*, Australian National University, 2012–2015
Thesis: 'Neutron-Capture Nucleosynthesis and the Chemical Evolution of Globular Clusters'
Department: Research School of Astronomy & Astrophysics
Primary Supervisor: Amanda Karakas
Advisors: David Yong, Gary Da Costa, John Lattanzio (Monash), Richard Stancliffe (Bonn)

*Bachelor of Science with Honours (First Class)*, Australian National University, 2008–2011
Majors: Astronomy & Astrophysics, Theoretical Physics, Mathematics
Thesis: 'The Sulfur Anomaly in Planetary Nebulae and Post-AGB Stars'
Department: Research School of Astronomy & Astrophysics
Supervisor: Amanda Karakas

*Bachelor of Information Technology*, Queensland University of Technology, 2003–2007
Major: Software Engineering

## Awards and Scholarships

RSAA Alex Rodgers Travelling Scholarship, 2014
Astronomical Society of Australia Travel Assistance, 2014
RSAA Honourable Mention for Best Student Paper Prize, 2013
IAU Travel Grant for IAUS298, 2013
Australian Postgraduate Award, 2012-2015
International Year of Astronomy Honours Scholarship, 2011
RSAA Summer Research Scholarship, 2010

## Service and Committees

QUB School of Maths and Physics Postdoctoral Society Representative, Jan 2016–present
QUB School of Maths and Physics Athena SWAN committee for gender equality, Jan 2016–present
QUB ARC Supernova Journal Club coordinator, Oct 2015–Oct 2016
ANU RSAA Stellar Lunch coordinator, Feb 2014–Nov 2014
ANU RSAA Computer Committee, Oct 2013–Apr 2015

## Technical Presentations

Contributed talk, The extragalactic explosive Universe: the new era of transient surveys and data-driven discovery, Garching, Germany, September 2019
Contributed talk, Workshop on Radiative Transfer in Supernovae, Garching, Germany, August 2019
Contributed talk, XIXth Workshop on Nuclear Astrophysics, Ringberg, Germany, March 2019
Invited Colloquium, ASTRON Institute for Radio Astronomy, Dwingeloo, Netherlands, November 2018
Contributed Talk, Radiation Transfer and Explosive Thermonuclear Burning in Supernovae, Rehovot, Israel, June 2018
Poster Presentation, Supernovae From Simulations to Observations and Nucleosynthetic Fingerprints, Bad Honnef, Germany, January 2017
Contributed Talk, Supernovae: The Outliers, Garching, Germany, September 2016
Contributed Talk, RAS National Astronomy Meeting, Nottingham, UK, July 2016

Contributed Talk, 18th Workshop on Nuclear Astrophysics, Ringberg, Germany, March 2016
Group Talk at Stars Meeting, Institute of Astronomy, Cambridge, UK, Nov 2015
Seminar, QUB, Belfast, UK, Oct 2015
Contributed Talk, ASA AGM, Perth, Australia, July 2015
Contributed Talk, ANITA Workshop, Canberra, Australia, Feb 2015
Contributed Talk, Mount Stromlo Student Christmas Seminars, Canberra, Australia, Nov 2014
Group Talk at Stars Meeting, Institute of Astronomy, Cambridge, UK, Sept 2014
Contributed Talk, Nucleosynthesis in AGB Stars, Bad Honnef, Germany, July 2014
Contributed Talk, Overcoming Great Barriers in Galactic Archaeology II, Palm Cove, Australia, 2014
Group Talk at Stellar Lunch, ANU RSAA, Australia, August 2013

## Teaching Experience

*Level Four MSci Project*                                   Queen's University Belfast
Sept 2017 – Jan 2018

Co-supervised two MSci students with projects on positron emission from Type Ia supernovae and high-mass stellar evolution with helium-rich abundances.

*PHY1001 Foundation Physics*                          Queen's University Belfast
Oct 2017

Presented lectures on circular motion and simple harmonic oscillators.

*ANU-ASTRO2x Exoplanets*                          Australian National University
Jun–Sep 2015

Teaching assistant for edX online course run by Brian Schmidt and Paul Francis on exoplanet search techniques – pulsar timing, radial-velocity variations, transits, microlensing, and direct imaging with adaptive optics.

*ANU-ASTRO1x Greatest Unsolved Mysteries of the Universe*,          Australian National University
Mar–Jun 2015

Teaching assistant for edX online course run by Brian Schmidt and Paul Francis covering the expanding universe, dark energy, dark matter, and gamma-ray bursts.

*ASTR3007 From Stars to Galaxies*                          Australian National University
Feb–Jun 2013 and May–Jun 2014

Teaching assistant for the third-year course on stellar evolution & nucleosynthesis, galactic structure & dynamics, and introductory computer programming. Duties included marking assignments and answering student questions in the classroom.

*PHYS1201 Physics 2*                          Australian National University
Jul–Nov 2012 and Jul–Nov 2013

Teaching assistant for first-year course covering introductory special relativity, electromagnetism, waves & optics, and thermodynamics. Duties included marking assignments and answering student questions in the classroom.
